

Viola F₁ Hybrid

PERFETTO

(*Viola wittrockiana*)

Seed Count 1,000 seeds / gr
Germination 20°C - 7-10 days light favored

Raw

Annual & Biennial

- Not too compact, not too stretching, better pot performance than existing Viola series
- Excellent series uniformity
- Available in broad range of blotch and clear colors
- Early and free flowering through fall to spring season
- Excellent garden performance with an abundance of up faced flowers during the winter season in mild climate regions

Perfetto Blue : Very attractive bright blue color

Perfetto Deep Marina : Attractive deeper marina color

Perfetto Yellow Jump Up : Good contrast of purplish blue color and yellow petals

Perfetto Blue Flash : Unique shading colors of yellow with blue picotee

Perfetto's pick up point

Wonderful pot performance!

Comparison A

Too compact
habit looks poor
performance

Perfetto

Continuous
flowering with
compact habit

Comparison B

Easy to stretch
on pot

Excellent pot performance even if under the high temperature condition.

The balanced plant covers pot soil naturally without stretching habit.

Perform and flower especially well with series uniformity.
